## Discussion Items

Item	Notes
 <a href="#">CMR-3856</a> - JIRA project doesn't exist or you don't have permission to view it.	<ul style="list-style-type: none"><li>• Lauren will take out of next sprint since there are no immediate issues to be worked; Cathy will continue testing, and if no issues found, we can close</li></ul>

## Action items

- ☒ Erich Reiter Send ISO file to NSIDC

- ☒ Erich Reiter Write an issue to remove Role from Metadata extension info
- ☒ Erich Reiter Find and update the current ticket regarding incorrect parsing and mapping of ISO Location keywords
- ☒ Erich Reiter Determine why Location keywords translation works in OPS but not UAT
  - ☒ I can't ingest into OPS so I haven't been able to see why this works in OPS. When I used the translate endpoint I get the same behavior in OPS, UAT, and SIT. The specific code hasn't changed in the last month so all environments should be behaving the same way.
- ☒ Erich Reiter Add comment in CMR-3849 regarding what the UMM mappings are for the ISO cases listed in the ticket
- ☒ Kathleen Carr Schedule a Special Topic on Validation rules at a near-term UTC (Planning for May 2 UTC)
- ☒ Kathleen Carr Schedule a meeting for next week; we will cancel if we have no agenda items
